EXPERIENCE

Taktyl Studios, REMOTE— Frontend Developer

December 2022 - PRESENT

- Spearheaded and oversaw 4 new projects from design, development, deployment to the optimization process.
- Collaborates with a team of designers and back-end developers to create websites, local and international.
- Performs optimization by setting up google analytics, google search console, and google adsense in selected projects.
- Mentors new team members in best practices adoption through meetings or coaching sessions.
- Addresses and troubleshoots any client requests and issues that may arise during the development of the project.

Shopify Store, REMOTE— Owner

March 2021 - February 2022

- Designed and developed a responsive, user-friendly, and dynamic website.
- Launched my own ecommerce store.
- Managed day to day operations such as processing orders, customer support, etc.
